IMPORTANT STATEMENT:

Allergen information is provided by the ingredient or product manufacturer. The information in this allergen brochure assumes compliance by DQ locations with ingredient requirements and standardized preparation procedures. However, since allergens are present in every DQ location and cross-contact can easily occur, American Dairy Queen Corporation cannot guarantee the accuracy of the data as it relates to prepared menu items at a location.

We suggest you inform the DQ location of any allergies prior to ordering, and ask to see the ingredient listings on the packaging for the product you would like to purchase. This allergen brochure contains permanent menu items in DQ approved system food restaurants (DQ Grill & Chill®, Brazier®, and limited Brazier locations). It does not apply to: (1) limited time offers; (2) non-system food locations offering food products that are not approved by ADO (you can identify approved system food locations by the DQ Grill & Chill®, Brazier®, and limited Brazier signs or by asking the restaurant operator); (3) food restaurants in Texas, which have their own authorized food system; (4) soft-serve treat products in some Illinois and New Jersey stores that use a soft-serve mix that may differ significantly in nutritional content from the DQ standard soft-serve, including increased butterfat content in the NJ stores; (5) some location-specific menu items.

Peanuts/Nuts: If you have peanut or nut allergies, these items are found and used in numerous products sold in DQ locations. Although our operators attempt to keep these items separate, it is impossible to guarantee that any DQ product will be free of peanut or other nut allergens.

Fish/Shellfish: If you have fish or shellfish allergies, such as shrimp or scallops, some of our locations may use the same equipment (including fryers and frying oil) for preparing and serving these items as is used for non-allergen containing items (such as French Fries). Although the frying process typically denatures the allergenic protein, it is possible for some of the allergenic protein to come into contact with other products. Therefore, fish and or shellfish allergens may remain in the oil or on surfaces and create cross-contact with other DQ products.

Soybean Oil: Our frying oil is a vegetable oil blend, which includes soybean oil. While soybean oil is not indicated as an allergen, you should consult with your doctor as to whether you need to avoid soybean oil.

For more detailed information on food ingredients, we suggest you visit the U.S. Food and Drug Administration Center for Food Safety and Applied Nutrition Web site at www.cfsan.fda.gov. For more detailed information about food allergies, we suggest you visit the Food Allergy and Anaphylaxis Network Web site at www.foodallergy.org.
